

EASYTEAM ONLINE

Welcome!

I'm Rob, the designer and architect behind EasyTeam Online.

The web application is designed for Team Scheduling with a shared Event Calendar.

I'm a rower with Bristol Gig Club, a club of more than 200 members, and we needed a platform that would streamline the management of our rowing activity.

Existing options were considered but lacked essential features.

For example, the ability to easily schedule recurring events and assign people and resources.

The EasyTeam Online web application makes scheduling sessions and assigning people and resources a simple task.

EasyTeam Online now supports collaborative team scheduling for **any** team or club.

We are delighted to be able to support communities and proud that teams and clubs in the UK & in Europe are already enjoying the platform.

There is no need to download or install any software and we are online 24/7.

The platform is fast, secure and scalable.

Sign up today for an interactive demo or a no obligation, free six month trial, with full support and advice, to help you and your team or club focus on what you enjoy most!

If you would like more information, please get in touch!
